

The most widely used online homework management system, with more than 2.2 million users and over one billion problems graded, **Enhanced WebAssign®** is the premiere course solution for instructors and students. Backed by superior reliability, support, and a proven track record, **Enhanced WebAssign** and **Cengage Learning** boast 99.99% uptime and unparalleled customer service and training.

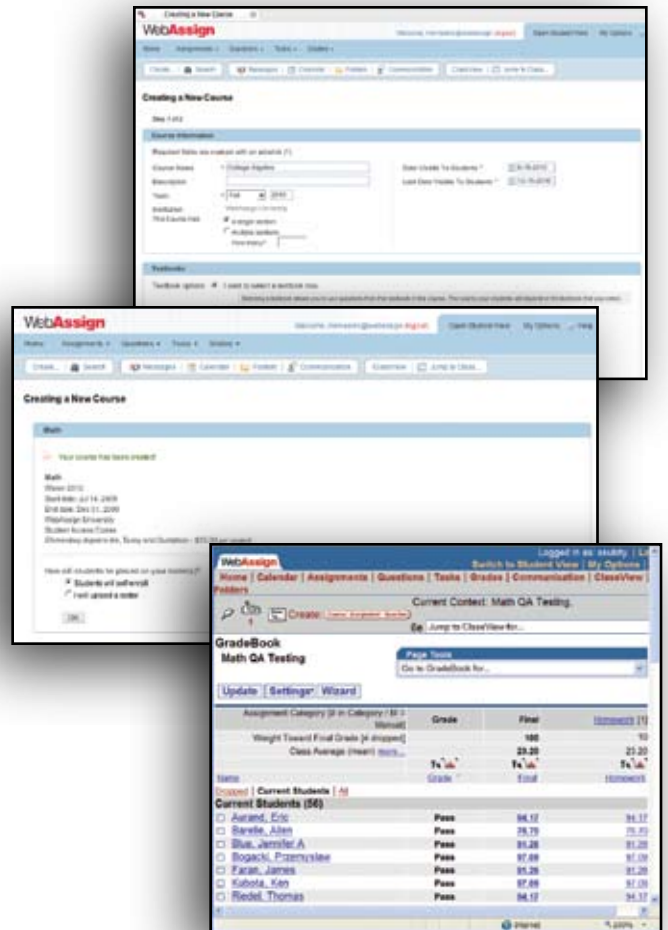

For students,
Enhanced WebAssign
provides a rich and flexible
set of tools including:

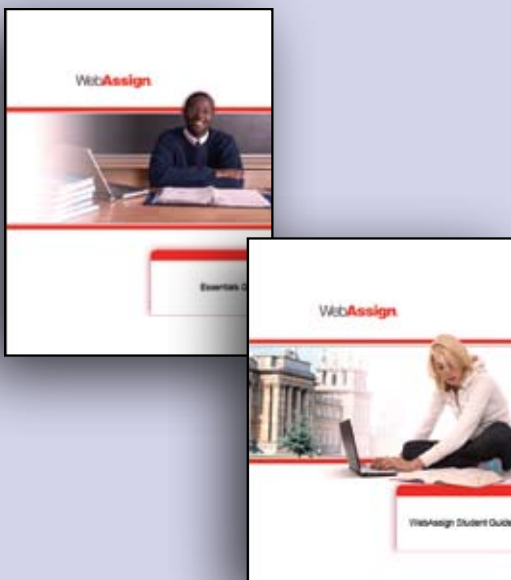

- *Access to as many as 2,000 practice exercises* pulled directly from the text's end-of-section problems, making it easy to select and assign homework. Additionally, you can supplement homework with thousands of questions available in other Cengage Learning texts at no extra cost.
- *Algorithmic solutions for problems* from most texts, showing students (at the instructor's discretion) how their specific exercise is solved, step-by-step.
- *Interactive examples* and/or step-by-step tutorials for specific exercises, helping students increase their understanding and build problem-solving skills.
- *Videos* that provide additional instruction on selected exercises and/or examples, relevant *eBook selections* that allow students to see the context of the problems they are solving, and carefully constructed feedback to help guide students to deeper understanding.
- *Personal Study Plans* for a growing number of texts, which help students identify topics and concepts they still need to master.
- *Interactive eBooks* for many Cengage Learning texts, which include highlighting, search, and note-taking functionalities, plus links to multimedia learning resources.

For Instructors:

- A simple, user-friendly interface lets you quickly master essential functions.
- *Course creation* can be completed in two steps.
- Choosing *student self-enrollment* allows students' account information to flow automatically to your roster.
- Create assignments in only five minutes.
- Assign homework immediately after course set-up, without having to wait for a central administrator. (Students can access **Enhanced WebAssign** instantly, given a 14-day grace period, allowing you to assign homework—and students to complete it—even if they have not purchased their access code or committed to taking the course.)
- *Algorithmic (randomized) versions of text exercises* allow you to assign unique versions of problems to each student.
- The intuitive *Question Editor* allows questions to be edited or added without learning a programming language.
- Automatic grading of online homework assignments.
- The Instructor gradebook allows you to weight categories and drop low scores.
- Student forums, bulletin boards, and messaging help keep the lines of communication open.

Technical Support

Platform requirements:

- **Enhanced WebAssign** is compatible with Windows®, Apple® Macintosh, and Linux®, and works with most web browsers.
- No proprietary plug-ins are required.
- The platform is timed, secured, password- and IP-restricted.
