

Dear Campus Reps,

Please print out the attached NYSMATYC Scholarship materials, and print two copies of the recommendation letter. The poster should be printed on a color printer if available. The deadline for mailing all scholarship applications and materials to me is **February 11, 2011**.

We need to reach as many qualified students as possible for these scholarships. In addition to distributing these materials to the faculty that are teaching **Calculus II or higher and those teaching the upper level post-Calculus II classes**, also try the following:

- Submit an announcement of the NYSMATYC Scholarships in your college electronic and/or printed news – especially the one distributed to the students.
- Give materials to faculty in the mathematics related fields, so that they can distribute to the students that may have already completed the mathematics requirements.
- Post the flyer around campus, but especially near mathematics faculty offices and your mathematics learning center.
- Use your college's Institutional Research Office to make a list of qualified students, and then directly send/give them the materials.

If you have any questions regarding the NYSMATYC Scholarships, please contact me. Thank you for your help reaching all of our qualified students.

Sincerely,

Donald C, Willner
